

Java Development Support and Maintenance

Smart Development and Reliable Support for Cost Effective Solutions

Java Services

We have been refining our Java expertise since we were formed in 1998. Our team are hugely experienced at using Java to create enterprise systems and applications, along with the commonly associated tools and databases, especially Oracle. Java is a cost effective solution that allows MSM to deliver the software you need.

A Team of Highly Experienced, Skilled, Qualified People

- All our staff are permanently employed in the UK.
- We only employ graduates with at least five years commercial experience.
- All staff have or work towards additional relevant professional qualifications such as Sun Java certification, ISEB or ITIL.
- Every member of staff undergoes a Criminal Records Bureau check, allowing us to work on sensitive matters. This is unusual in the software industry.
- We spend double the industry average on training.

Why Choose MSM?

We supply bespoke software solutions that completely match your needs.

The majority of our competitors provide package solutions which frequently reduce competitive advantage while only

fulfilling 80% of the business needs.

Outsourcing the development or maintenance of your Java solution will reduce your costs and give you access to a highly experienced team of developers. It is unusual to find teams who are capable and willing to take over the support and maintain of systems written by other people.

- We provide first class software development and IT consultancy.
- Our fundamental ethos is to provide best business solutions.
- We specialise in departmental and enterprise applications for corporates and database applications for small/medium enterprises.

Our software development expertise covers the full life-cycle from accurate estimating to business requirements analysis, through feasibility study, specification, analysis, design, prototyping, programming, testing and deployment, to on-going support and enhancement. Projects are controlled and managed under the control of our ISO 9001 accredited quality management system.

SUPPORT SOLVED

Meet some of our Java Developers

Be assured that only the best technical expertise will be applied to your project. You can see for yourself the quality and wealth of experience in our Java development team.

Jon Stace B.Sc. (Hons), MCAD MCTS MCPD
Principal Technical Consultant

12 years commercial experience of object oriented software development with technologies such as Java and .NET, Jon is our internal consultant providing architecture and design advice to the whole team. Excellent Oracle and PL/SQL optimiser.

Experience in the financial services, environmental, construction, marine and other industries. Available as Principal Technical Consultant, Senior Team Leader and Lead Developer for all types of Java and Oracle projects.

Johnathan Bartram BSc. (Hons)
Support Team Leader

18 years commercial experience, with the last 8 specifically focusing on Java, C++, C# and Delphi. As a team leader Johnathan has overall responsibility for support and maintaining service levels for a number of clients covered by both teams in the department.

Sinead O'Brien B.A. Int. (Hons), MAPM
Support Manager

Leading our dedicated support team and managing our ongoing relationships with clients. Experienced with various legacy and modern databases such as Paradox, dBase, Interbase and SQL Server. Absolutely unflappable and pleased to support Java applications for many clients.

10 years commercial experience of development across our whole portfolio, especially in the not for profit, health and financial services sectors.
