

Delphi Development, Support and Maintenance

From the World's Only Delphi Centre of Excellence

We have been refining our Delphi expertise since we began in 1998. Our team are hugely experienced at using Delphi to create enterprise systems and applications, along with the commonly associated tools and databases. Delphi is a cost effective solution that allows MSM to deliver the software you need at realistic prices.

A Team of Highly Experienced, Skilled, Qualified People

- All our staff are permanently employed in the UK.
- We only employ graduates with at least five years commercial experience.
- All staff have or work towards additional relevant professional qualifications such as ISEB or ITIL.
- Every member of staff undergoes a Criminal Records Bureau check, allowing us to work on sensitive matters. This is unusual in the software industry.
- We spend double the industry average on training.

Why Choose MSM?

We supply bespoke software solutions that completely match your needs.

The majority of our competitors provide package solutions which frequently reduce competitive advantage while only fulfilling 80% of the business needs.

Outsourcing the development or maintenance of your Delphi solution will reduce your costs and give you access to a highly experienced team of developers. It is unusual to find teams who are capable and willing to take over the support and to maintain systems written by other people.

- We provide first class software development and IT consultancy.
- Our fundamental ethos is to provide best business solutions.
- We specialise in departmental and enterprise applications for corporates and database applications for small/medium enterprises.
- We have the best Delphi skills in the country, thanks to continually investing in them since 1998. We have a Delphi Centre of Excellence. Chris Purrington, Borland's former UK MD, described us in 1999 as "One of the top 3 Delphi software houses in the UK." Since then, the other two have dropped out of the market.

Our software development expertise covers the full life-cycle from accurate estimating to business requirements analysis, through feasibility study, specification, analysis, design, prototyping, programming, testing and deployment, to on-going support and enhancement. Projects are controlled and managed under the control of our ISO 9001 accredited project management methodology.

Meet some of our Delphi Team

Be assured that only the best technical expertise will be applied to your project. You can see for yourself the quality and wealth of experience in our Delphi development team.

Jon Stace B.Sc. (Hons), MCAD MCTS MCPD
Principal Technical Consultant

12 years commercial experience of object oriented software development with technologies such as Delphi and latterly .NET, Jon is our internal consultant

providing architecture and design advice to the whole team. Excellent SQL Server T/SQL optimiser.

Experience in the financial services, environmental, construction, marine and other industries. Available as Principal Technical Consultant, Senior Team Leader and Lead Developer for all types of Delphi, .NET and SQL Server projects.

Simon Gibbs B.Sc. (Hons) MCTS
Technical Consultant

11 years commercial experience in several high profile consultancies including MSM. Highly capable whether developing client/server or n-tier solutions in any industry.

Very able SQL Server designer and DBA.

Exceptional experience of many sectors on both small and large projects. Available as Technical Consultant, Team Leader and Lead Developer for all types of Delphi & database projects.

Sinead O'Brien B.A. Int. (Hons), MAPM
Support Manager

Leading our dedicated support team and managing our ongoing relationships with clients. Experienced with various legacy and modern databases such as Paradox,

dBase, Interbase and SQL Server. Absolutely unflappable and pleased to continue to support Delphi applications for many clients.

10 years commercial experience of development with Delphi and associated tools, especially in the not for profit, health and financial services sectors.

MSM Services Include:

Consultancy Solved

For requirements gathering, proofs of concept, business cases and wider consultancy.

Development Solved

For custom software development and database design.

Support Solved

For routine support and preventative maintenance of our own systems and those written by third parties.

SharePoint Solved
