

# Microsoft Gold Certified Partner

## Highly Qualified, Professional Team are the Foundation of MSM

We are closely associated with Microsoft which enable us to deliver more cost effective modern solutions to our clients.

We hold their ultimate accolade, being Microsoft Gold Certified Partners (# 1021101) meaning that our team are qualified to design and develop solutions using Microsoft technologies.

## A Team of Highly Experienced, Skilled, Qualified People

- All our staff are permanently employed in the UK.
- We only employ graduates with at least five years commercial experience.
- All staff have or work towards additional relevant professional qualifications such as Microsoft certification, ISEB or ITIL.
- Every member of staff undergoes a Criminal Records Bureau check, allowing us to work on sensitive matters. This is unusual in the software industry.
- We spend double the industry average on training.

## Why Choose MSM?

We supply bespoke software solutions that completely match your needs.

The majority of our competitors provide package solutions which frequently reduce competitive advantage while only fulfilling 80% of the business needs.

- We provide first class software development and IT consultancy.
- Our fundamental ethos is to provide best business solutions.
- We specialise in departmental and enterprise applications for corporates and database applications for small/medium enterprises.
- The use of Microsoft technologies allows us to be more productive than using Java or PHP; it is widely accepted that across the industry, a Developer can write about one third more per day using C# than Java.

Our software development expertise covers the full life-cycle from accurate estimating to business requirements analysis, through feasibility study, specification, analysis, design, prototyping, programming, testing and deployment, to on-going support and enhancement. Projects are controlled and managed under the control of our ISO 9001 accredited quality management system.

**98%**  
of projects  
delivered on  
time and  
on budget.

DEVELOPMENT SOLVED

# Meet some of our Microsoft .NET team

Be assured that only the best technical expertise will be applied to your project. You can see for yourself the quality and wealth of experience in our .NET team.

**Jon Stace B.Sc. (Hons) MCAD**  
**Principal Technical Consultant**

12 years commercial experience of object oriented software development with technologies such as .NET, Jon is our most highly skilled, most versatile developer. Jon is our internal consultant providing

architecture and design advice to the whole team. Excellent SQL Server T/SQL optimiser.

Experience in the financial services, environmental, construction, marine and other industries. Available as Principal Technical Consultant, Senior Team Leader and Lead Developer for all types of .NET and SQL Server projects.

**Simon Gibbs B.Sc.(Hons) MCTS**  
**Technical Consultant**

11 years commercial experience in several high profile consultancies including MSM. Highly capable whether developing client/server or n-tier solutions in any industry. Very able SQL Server designer and DBA.

Exceptional experience of many sectors on both small and large projects in several technologies such as C#, the .NET framework and C++.

Available as Technical Consultant, Team Leader and Lead Developer for all types of projects.

**Brendan Caylor B.A. (Hons) MAPM**  
**Technical Consultant**

9 years commercial experience with the Microsoft tool set, especially .NET and SQL Server.

Specialising in web-based solutions with a strong eye for graphic design. Brendan works with all types of project teams, from marketing departments designing new web sites to business owners and dedicated IT professionals.

A real asset to our team, Brendan is responsible for seeing that smaller projects receive the same care and attention as our larger developments.
